Patient Treatment Form
August 10, 2009

Patient	Patient Selection
	Select Patient: 
	<input type="text" value="001"/>
	Date of Enrollment (YYYY-MM-DD):
	<input type="text" value="2009-04-02"/>
	Number of treatments already entered:
	<input type="text" value="0"/>

Treatment Start **Treatment Start:** Enter information here if the patient is starting a **new treatment**. If current (ongoing) treatment information is displayed for your selected patient, do not enter information in this section.

Treatment End **Treatment End:** Enter information here if current (ongoing) treatment information for your selected patient is displayed and the current treatment is ending. If you are entering information in this section, you must enter a **Best Response** to indicate that the current treatment is at an end.

Treatment Continue **Treatment Continue:** Enter information here if current (ongoing) treatment information for your selected patient is displayed and the therapy type for the current treatment is changing. If you are entering information in this section, you must enter information about the **date and type of change in therapy** for the current (ongoing) treatment.

**select patient
barcode**

When a patient is selected, the form displays the number of treatments completed by the patient.

If there is a current (ongoing) treatment, then information about the ongoing treatment is displayed.

Treatment Start is used when a new treatment begins.

Treatment End is used when a treatment is completed and Best Response is recorded.

Treatment Continue is used when an ongoing treatment has a therapy type change.

Treatment Start

Treatment Start: Enter information here if the patient is starting a **new treatment**. If current (ongoing) treatment information is displayed for your selected patient, do not enter information in this section.

Treatment Start

Treatment Start

Do you want to enter information? : 

Yes

Select Therapy settings : 

Adjuvant Chemo

Adjuvant Chemo

Neoadjuvant Radiochemo

Metastatic Disease Chemo

FOLFOX/xelox

Select Start date (YYYY-MM-DD):

Adjuvant Therapy Start - Comments:

Treatment Start

Treatment Start is used to begin a new patient treatment. You will specify both the therapy setting and the therapy type.

You first select the Therapy Setting:
Adjuvant Chemo
Neoadjuvant RadioChemo
Metastatic Disease Chemo

You then select Therapy Type and Start Date.

Information about the type and start dates depend on the setting selected.

Comments are optional.

Treatment Start

Treatment Start: Enter information here if the patient is starting a **new treatment**. If current (ongoing) treatment information is displayed for your selected patient, do not enter information in this section.

Treatment Start

Treatment Start

Do you want to enter information? :

Yes

Select Therapy settings :

Adjuvant Chemo

Select Therapy type:

FOLFOX/xelox

FOLFOX/xelox

FOLFOX/xelox + Bevacizumab

FOLFOX/xelox + Cetuximab

Xeloda

Other

Adjuvant Therapy Start - Comments:

Treatment Start

select therapy setting and then select therapy type for that setting

Adjuvant Chemo therapy setting is selected here.

Therapy type options depend on the setting. Choices for Adjuvant Chemo are shown to the left.

If you select therapy type Other, you will be prompted for a description of the therapy type.

Then enter therapy start date and optional comment.

Treatment Start

Treatment Start: Enter information here if the patient is starting a **new treatment**. If current (ongoing) treatment information is displayed for your selected patient, do not enter information in this section.

Treatment Start

Treatment Start

Do you want to enter information? : 

Yes 

Select Therapy settings : 

Neoadjuvant Radiochemo 

Select Therapy Type: 

FOLFOX/xelox 
FOLFOX/xelox
FOLFOX/xelox + Bevacizumab
FOLFOX/xelox + Cetuximab
Xeloda
Other

Select Radiation Start Date (YYYY-MM-DD):

NeoAdjuvant Therapy Start - Comments:

Treatment Start

select therapy setting and then select therapy type for that setting

Neoadjuvant Radiochemo therapy setting is selected here.

Therapy type options depend on the setting. Choices for Neoadjuvant Radiochemo are shown to the left.

If you select therapy type Other, you will be prompted for a description of the therapy type.

Treatment Start

Treatment Start: Enter information here if the patient is starting a **new treatment**. If current (ongoing) treatment information is displayed for your selected patient, do not enter information in this section.

Treatment Start

Treatment Start

Do you want to enter information? : 

Yes 

Select Therapy settings : 

Neoadjuvant Radiochemo 

Select Therapy Type: 

FOLFOX/xelox 

Select Start Date (YYYY-MM-DD):

Select Radiation Start Date (YYYY-MM-DD):

NeoAdjuvant Therapy Start - Comments:

Treatment Start

For the Neoadjuvant Radiochemo therapy setting, you will enter a two start dates.

The second start date identifies when radiation begins.

Treatment Start

Treatment Start: Enter information here if the patient is starting a **new treatment**. If current (ongoing) treatment information is displayed for your selected patient, do not enter information in this section.

Treatment Start

Treatment Start

Do you want to enter information? :

Yes

Select Therapy settings :

Metastatic Disease Chemo

Select Therapy Type:

FOLFOX/xelox

Select Start Date (YYYY-MM-DD):

Metastatic Disease Chemo Therapy Start - Comments:

Treatment Start

select therapy setting and then select therapy type for that setting

Metastatic Disease Chemo therapy setting is selected here.

Therapy type options depend on the setting.

If you select therapy type Other, you will be prompted for a description of the therapy type.

Then enter therapy start date and optional comment.
